- An officer conducted a ride along with a citizen.
- Officers completed seven hours of online training.

REPORTING AN INCIDENT? NEED AN OFFICER?

- To report an emergency, dial 9-1-1
- To report a non-emergency, dial (253) 287-4455
- If you aren't sure, let us help you by dialing (253) 964-7060

If you have non-urgent questions, suggestions, want to file a complaint or commend a D.P.D. staff member, we appreciate the opportunity to assist you. You may reach us via email at Police@dupontwa.gov or by telephone at (253) 964-7060.

A MESSAGE FROM PIERCE COUNTY EMERGENCY MANAGEMENT: READY - SET - GO! KNOW WHAT TO DO IN AN EMERGENCY

With smoke recently inundating our region and the evacuations for the wildfires in the Spokane area on people's minds, the four Western Washington counties of King, Pierce, Snohomish, and Thurston are joining forces, along with partners, to launch a regional "Ready, Set, Go!" Evacuation Campaign. This initiative aims to simplify evacuation messages to the public. These clear, straightforward messages are intended to save lives as people prepare to evacuate.

Due to climate change, the risk of wildfires has spread to the west side of the Cascades, an area that historically has not seen widespread wildfires. Once a rare occurrence, wildfires have now become an annual threat, requiring public outreach and preparation.

The "Ready, Set, Go!" evacuation campaign informs the public on how to respond to the three levels of evacuations (traditionally Levels 1, 2, and 3), and prepares them on the actions they should take at each level when alerted by authorities.

This evacuation program is also intended for an all-hazards evacuation approach with an initial emphasis on wildfires.

Key Components of the Campaign:

Level 1 "Ready" Phase: Be aware of the danger in your area and start preparing for possible evacuation. Monitor local media and check on neighbors. If you do not already have an evacuation plan or a Go! kit, assemble these now. Conditions can change suddenly, and you may not receive a Level 2 "Be Set" warning before you are ordered to Level 3 "Go!" Prepare both the inside and outside of your home for fire. Leave if you feel unsafe -- do not wait for an official evacuation order.

Level 2 "Set" Phase: Short notice evacuation likely in your area (Level 2) – Be prepared for sudden evacuation. People who need help or more time to evacuate — people with disabilities, people with small children, people with medical conditions and people with large animals — should evacuate now. Ensure your evacuation plan checklist is complete and that your Go! kit is in your vehicle. Stay informed and be aware of alerts from local law enforcement and fire departments. Always remember to leave if you feel unsafe, do not wait for an official evacuation order.

Level 3 "Go" Phase: Evacuate immediately from your area (Level 3) – Go now! Danger in your area is current or imminent. Follow directions from law enforcement or fire departments and do not return home until officials have determined it is safe. Notification that it is safe to return home will be given as soon as possible.

The "Ready, Set, Go!" Evacuation Campaign is a testament to the power of collaboration. By bringing together the expertise of multiple counties, emergency response agencies, and community organizations, the campaign can create a more resilient and informed population.

Residents of King, Pierce, Snohomish, and Thurston Counties are encouraged to participate actively in the "Ready, Set, Go!" Evacuation Campaign. By preparing their homes, accessing informational materials, and staying informed about local emergency updates, individuals can play a vital role in enhancing the safety and preparedness of their communities.

#OnePillCanKill

National Fentanyl Prevention and Awareness Day

Would you share the message if
you could save a life?

ILLICIT FENTANYL IS THE SINGLE DEADLIEST DRUG THREAT OUR NATION HAS EVER ENCOUNTERED.

#FACINGFENTANYL

Families impacted by fentanyl want you to know what we didn't before it's too late. Americans are dying every 5 minutes from a drug death. Children under 14 are dying from fentanyl poisoning faster than any other age group. Distributors are reaching youth through social media apps like Snapchat to make it effortless to obtain drugs. Starting the conversation about fentanyl and teaching prevention is essential to saving lives. Together we can share the message about dangerous drugs and spare families from the devastation of fentanyl poisoning.

BE AWARE, BE SAFE, BE ALIVE.

#ONEVOICE

YOU CAN
#BETHECHANGE

WE NEED YOU
National Fentanyl Prevention and Awareness Day on August 21 was created by families impacted by a fentanyl death and grassroots organizations bringing awareness to the dangers of illicit fentanyl. We need all hands on deck to warn Americans and work for solutions to save lives, and WE NEED YOU. Every effort can save a life. We are proud to be supported by:

- The Drug Enforcement Agency DEA
- National Sheriff's Association
- Project Optima
- National Crime Prevention Council
- Home Land Security HSI
- Centers for Disease Control CDC
- Trucking Carriers Foundation

IT'S ABOUT AWARENESS AND PREVENTION ALL YEAR LONG

#STOPITBEFOREITSTARTS

Project Facing Fentanyl is the home of National Fentanyl Prevention and Awareness Day. August 21st is important to us, but saving lives is important every day of the year. Over 200,000 people died from fentanyl poisoning and other drug deaths in the last three years and expected to grow. Our families are busy every day working in every aspect of the fentanyl crisis. The flood of fentanyl into our country and the public health crisis it poses is unprecedented. Sadly, with the deaths, the list of issues continues to grow. We are urgent for solutions and to work with people and organizations that can effect positive change. We welcome new partners to collaborate with and are always interested in ways to grow our voice.

Recovery communities in action
sharing our message

As we approach **Fentanyl Prevention and Awareness Day on August 21st** and **International Overdose Awareness Day on August 31st**, we want to emphasize that each life lost to a drug death is equally important regardless of the drug or day memorialized. August is a month to bring awareness to all drug-related deaths. Drugs have become more dangerous and deadlier than ever before. Fentanyl is attacking in a different way than drugs of the past. Fentanyl kills users, the unsuspecting, and those experimenting. Over 200,000 people have died in 2 years from drug-related deaths. Fentanyl is in counterfeit pills that look real and other drugs that pose as heroin or cocaine. When Fentanyl is in pills, powders, and Marijuana, it is clear there is no end to the possibilities of dangers. Recently xylazine and other deadly substances have been mixed with Fentanyl leaving people to overdose or poison without a quick response antidote. Supply, addiction, stigma, lack of education, accountability, recovery options, and mental health are pieces to the problem. We must work together for solutions to save human lives, regardless of the "particulars" of this fight. There is no one way, and all the answers have become important. One thing is sure: Teaching prevention and educating people can save lives.

Please join us on August 21st for National Fentanyl Prevention and Awareness Day.
