Safety Message - Smoke Alarm Safety

Smoke alarms save lives. Smoke alarms that are properly installed and maintained play a vital role in reducing fire deaths and injuries. Fire spreads fast—working smoke alarms give you early warning so you can get outside quickly.

Statistics

- Roughly three out of five fire deaths happen in homes with either no smoke alarms or no working smoke alarms.
- More than one-third (38 percent) of home fire deaths result from fires in which no smoke alarms are present.
- The risk of dying in a home fire is cut in half in homes with working smoke alarms.

Source: [NFPA Research](#)

Safety Tips

- Install smoke alarms in every sleeping room and outside each separate sleeping area. Install alarms on every level of the home. Install alarms in the basement.
- It is best to use interconnected smoke alarms so that when one smoke alarm sounds, they all sound.
- Test all smoke alarms at least once a month. Press the test button to be sure the alarm is working.
- A closed door may slow the spread of smoke, heat, and fire.
- Working smoke alarms are an important part of a home fire escape plan.

Fire Safety Checklist for Homeowners and Renters

If there is a fire, you may have less than 3 minutes to get out of your home. Talk about what you should do to be safe. Make sure everyone in your home knows what to do if there is a fire.

Put a check in front of each statement that is true for your home.

Smoke Alarms

- ☐ Smoke alarms are on every level of the home.
- ☐ Smoke alarms are inside and outside sleeping areas.
- ☐ Smoke alarms are tested each month.
- ☐ Smoke alarm batteries are changed as needed.
- ☐ Smoke alarms are less than 10 years old.

Test your alarm regularly.
Your smoke alarm is working if it makes a noise when you press the "test" button.

Cooking Safety

- ☐ The cooking area has no items that can burn.
- ☐ People stay in the kitchen when they are frying, grilling, boiling, or broiling food.
- ☐ Pot handles are always turned toward the back of the stove.

Escape Plan

- ☐ There is a fire escape plan that shows 2 ways out of every room.
- ☐ Everyone knows where the safe meeting place is outside the home.
- ☐ Everyone living in the house practices the escape plan 2 times a year.

Carbon Monoxide Alarms

- ☐ Carbon monoxide alarms are located on each level of the home.
- ☐ Carbon monoxide alarms are less than 7 years old.

Electrical and Appliance Safety

- ☐ All electrical cords are in good condition and not broken or cut.
- ☐ People clean the dryer of lint after every use.
- ☐ All plug outlets are safe and do not feel warm when you touch them. (If they are warm, call the landlord or an electrician.)

Candle Safety

- ☐ Candles are in sturdy fire-proof containers that won't be tipped over.
- ☐ Adults blow out all candles when leaving the room or going to bed.
- ☐ Candles are kept out of reach from children and pets.

Children are sometimes curious about fire.

If you have children in your home, lock up any items that can start a fire (matches, lighters, cigarettes, etc.) and make sure children cannot reach candles.
